

Smart Motorized Ball Valve

The LubeQuip Smart Motorized Ball Valve is an innovative solution designed for precision, safety, and convenience in flow control. This smart valve combines cutting-edge technology with practical functionality, making it an ideal choice for modern lubrication systems.

Remote Operation

Control the valve remotely through a mobile app via Wi-Fi, enabling adjustments from virtually anywhere.

· Flow Scheduling

Program automatic opening and closing times to optimize efficiency, prevent leaks, and extend the lifespan of pumps and equipment.

• Dual Control Options

Switch between remote operation and a manual override, ensuring functionality during network interruptions.

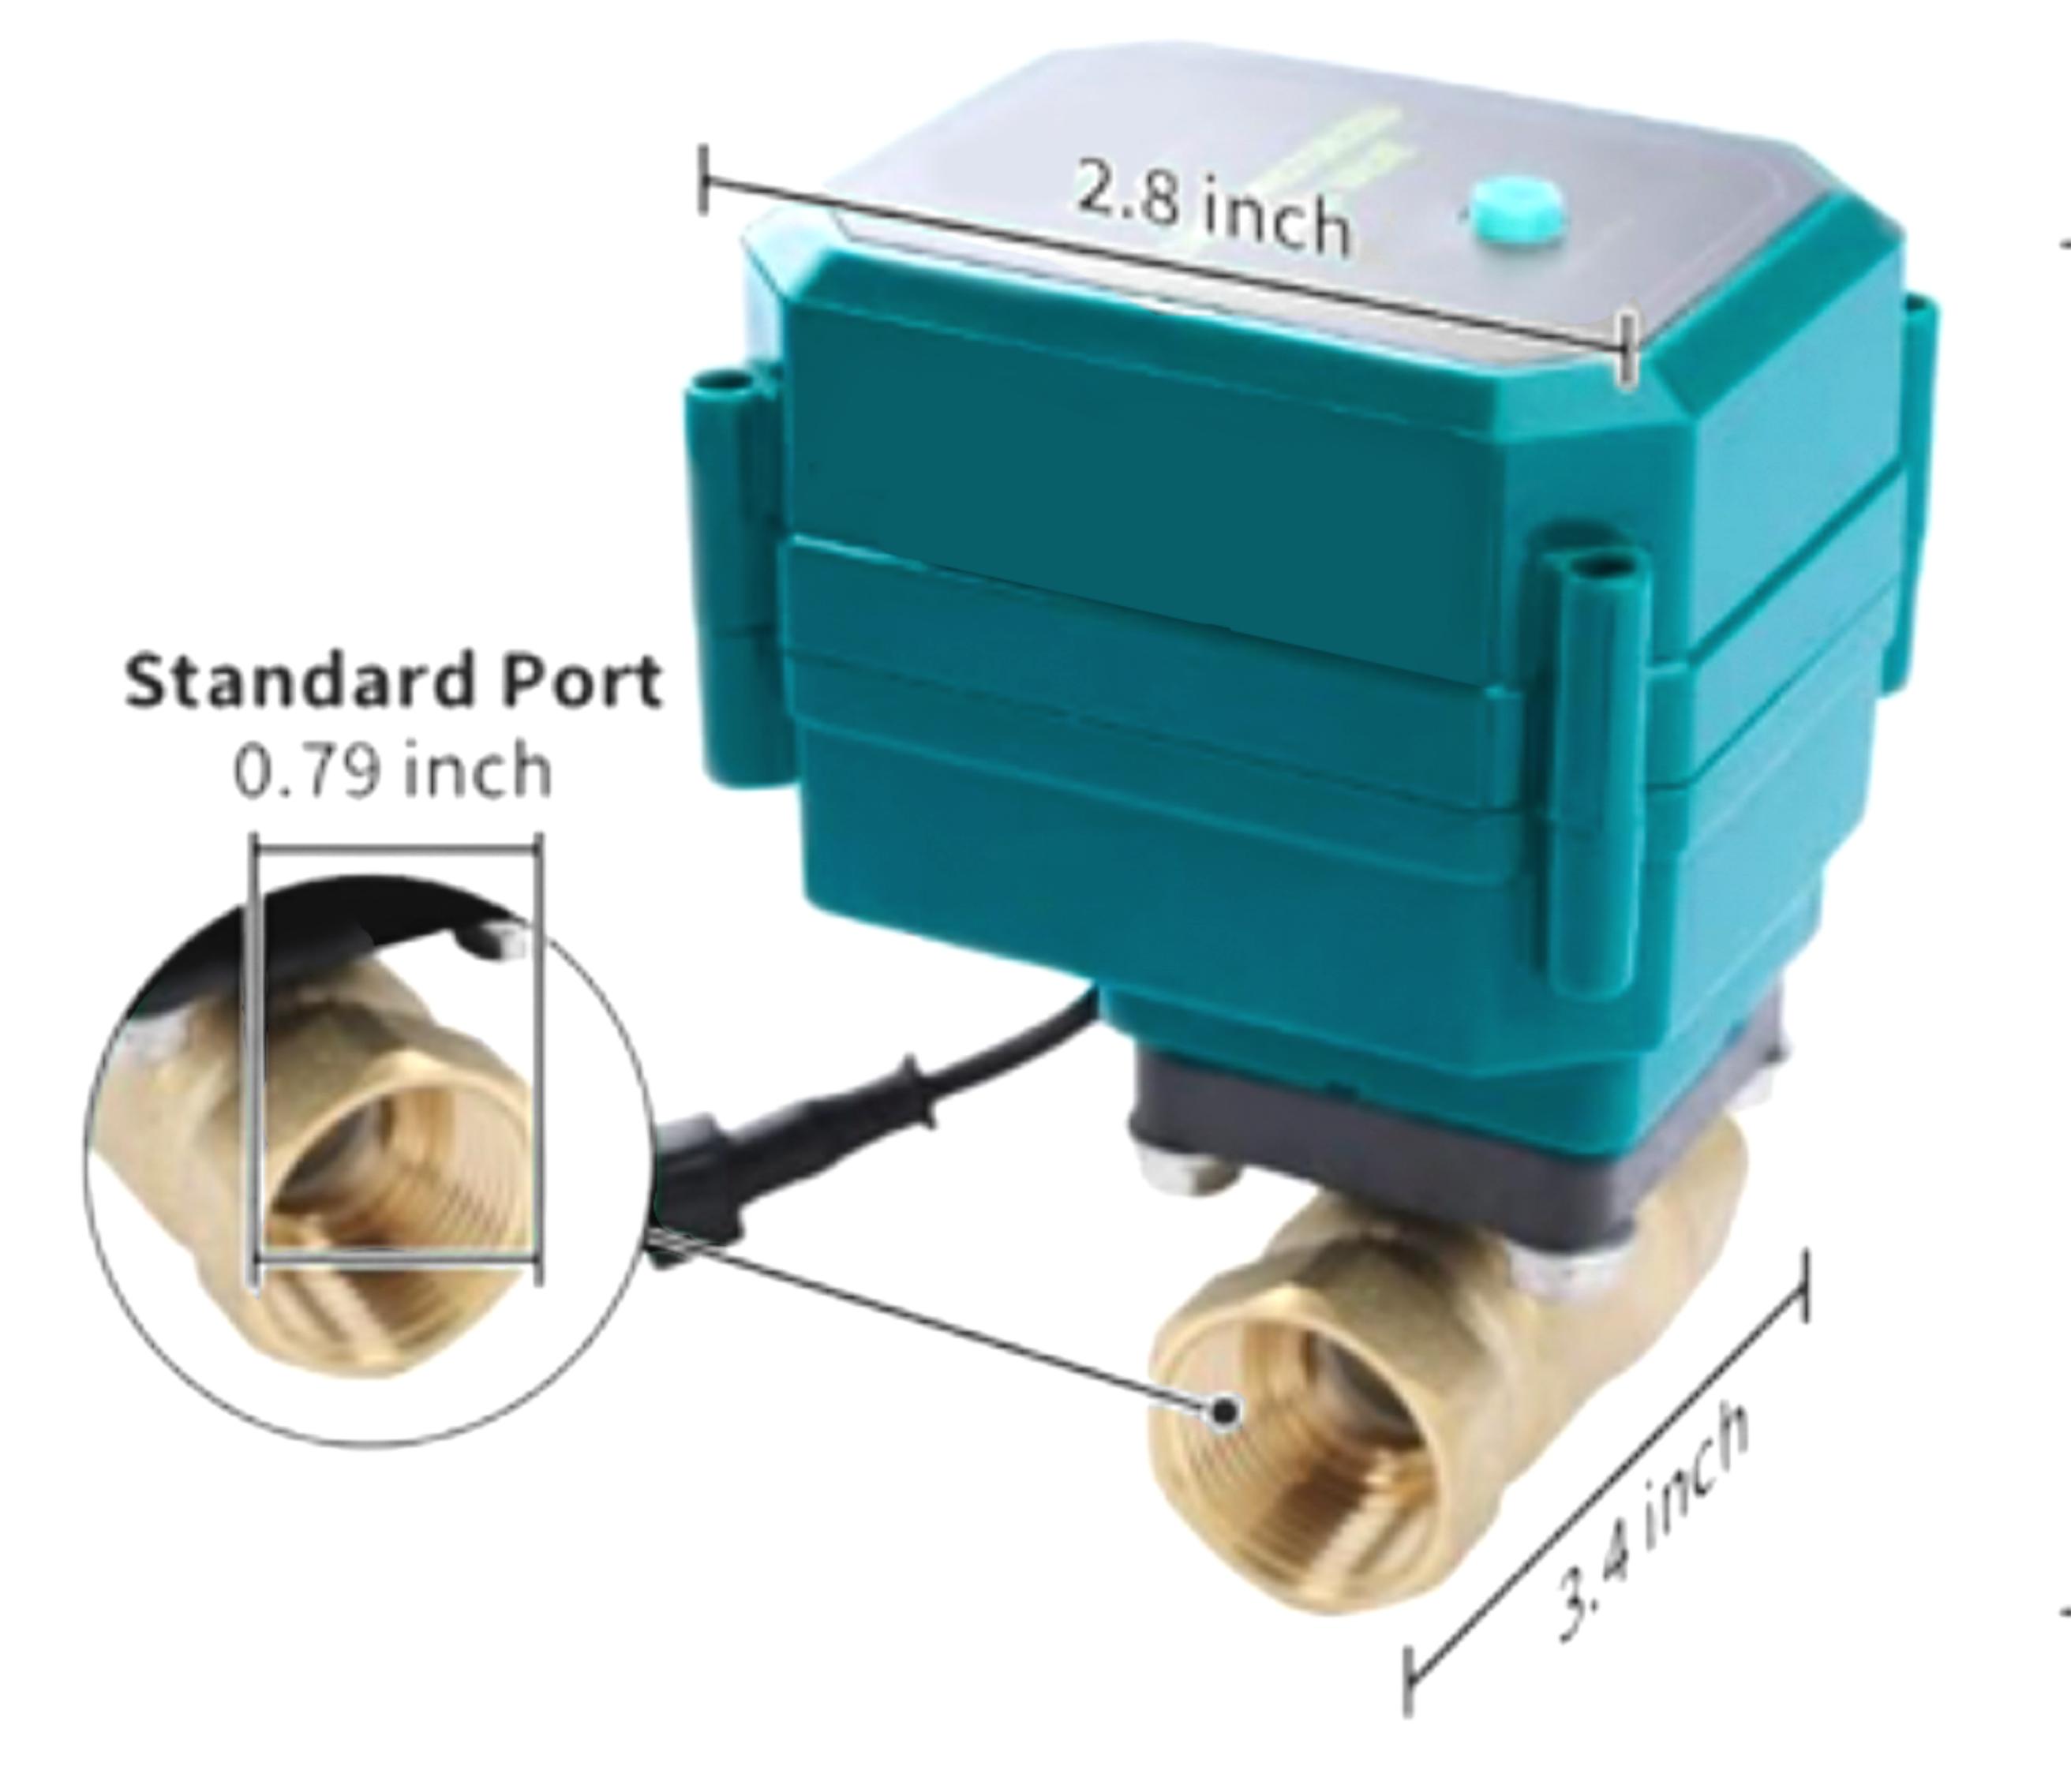

Features USB-powered wiring and an automatic shutoff mechanism that closes the valve within 2 seconds of power loss for enhanced safety.

• Durable Performance

Engineered for long-term reliability with a lifespan of 80,000 to 100,000 cycles.
